Skills

Operating systems

Windows and Linux:
Remote access, active directory,
networks, user permissions, hard
drive partitioning, SSH client, DNS,
NFS client, Samba.

Programming Languages

Java, Python, PHP, JavaScript.

Database management

Access, MySQL, SQL Server,
phpMyAdmin.

Web Development

Bootstrap, jQuery, AngularJS

Frameworks

Laravel in order to quickstart PHP
applications.
JHipster in order to create a fully
functional AngularJS-based
front-end, and a SpringBoot-based
back-end.

Highlights

Proactive

Trustworthy

People oriented

Creatively solve problems

Easily adapt to new situations

Able to operate effectively in a team

Experience

PHP Programmer

Tiendeo. Jun 2016 - Feb 2017

Extraction of information through regular expressions. Storage of the data in XML files for their later use. Creation of scraping bots (web crawlers). Web debugging in order to obtain data structured in JSON files and isolate data retrieved by POST method.

Speaker

AngularCamp July - 2017

After my studies in Stucum, I had the chance to partake as a speaker in Angular Camp 2017. It was a fantastic experience! In our talk we covered what JHipster is, what it is used for, and how to start using it.

Education

Technician in Development of Web Applications, Stucum, 2017

Web applications development, implementation, and support, using specific technologies to ensure a safe access to the data, while considering the standards and criteria of accessibility and usability.

Courses and certifications

- Google: Introducción al Desarrollo Web, 2016
- Microsoft: Introduction to Python for Data Science, 2016
- openSAP: Developing Web Apps with SAPUI5, 2016
- Montreal International Language Centre:
Certificate in Advanced English, 2014

Languages

English: C-1

(well written and spoken)
